

FOUNDATIONS OF ENERGY SAVINGS PERFORMANCE CONTRACTING IN MISSISSIPPI

September 14, 2023
1:00 p.m - 2:30 p.m CT

Energy Savings Performance Contracting (ESPC) offers states, local governments, and institutional facilities the opportunity to finance energy efficiency investments by leveraging the energy, water and operational cost savings that projects achieve over time. Facilities such as state and municipal buildings, universities, K-12 schools and hospitals, as well as highway, street and parking lot lighting, are particularly well suited to these investments. This workshop gathers stakeholders interested in leveraging ESPC to finance energy projects throughout Mississippi, provide an overview of how to apply this financing mechanism, and allow participants to hear directly from facility managers who have implemented these projects in the state.

Agenda

- 1:00 – 1:15 p.m Introductions
- 1:15 – 2:00 p.m Foundations of ESPC
Chris Haplin, Energy Services Coalition
- 2:00 – 2:15 p.m Case Study University of Mississippi's ESPC Project
Dean Hansen, Facilities Management Director, University of Mississippi
- 2:15 - 2:30 p.m Discussion and Q&A

Members of the Mississippi Municipal League will receive
two CMO elective credits for attending.
