

MML On-Demand Webinars

The MML has the following webinars available on-demand. Please check the box next to the webinar(s) that you'd like to view, and return this registration form to the MML office. Each webinar has a \$25 registration fee and will award you 3 CMO elective credits. The League will create an invoice to send to your city hall to collect payment. All webinar links will be sent via email, so please list a viable email address below to receive the access link.

End of Term: The Do's and Don'ts of Your Last Six Months in Office

The Mississippi State University Extension Center – Center for Government and Community Development reviews important things to remember as you serve out your final six months in office, including statutory budget restrictions leading up to the election and things that you as a municipal official should be getting ready for the next administration coming in.

Are You Ready for a Pandemic?

How prepared is your city or town for another pandemic? In this session you will hear from emergency preparedness and health experts on steps you can take to be prepared for the future.

New Trends in Policing - Is your Police Department Ready to Respond to Today's Challenges?

Sponsored by Government Consultants, Inc.
Law enforcement agencies around the country face a multitude of challenges in protecting communities and responding to incidents. Issues ranging from dealing with individuals with mental illness, cognitive or physical disabilities, or coping with the effects of trauma, to the examination of use of force policies, to confronting racial and gender bias, are the new reality for law enforcement agencies. This session will discuss new trends in policing designed to better equip law enforcement agencies and individual officers to meet these challenges.

Municipal Government & Social Media: Tips to Protect Yourself and Your Municipality from First Amendment Liability

Presented by Phelps Dunbar
Many municipalities operate both municipal-wide and departmental social media pages. Many public officials likewise operate personal social media pages. This webinar will address legal issues surrounding both, including a discussion of recent Supreme Court decisions regarding when a public official's personal page might be considered public speech.

Leveraging Assets for Community Development: Real World Case Studies

Sponsored by C Spire
This webinar will highlight three diverse communities across the United States that have leveraged local assets such as cultural tourism and natural resources to improve the quality of life for residents.

Energy Services Contracting 101

Learn how to use existing municipal budgets to upgrade your buildings' energy systems without any upfront capital investment. We will cover Mississippi's legislation for energy services as it applies to municipalities, clearly define the energy services contracting process and describe the most common types of projects that are funded through energy services contracting in the municipal market segment. We'll also take a deep dive into best value leasing options for the latest outdoor lighting and surveillance technologies.

Why Implementing Managed Cybersecurity Services from an Established, Proven, and Trusted IT Partner like BCI is Vital To All MML Members

Sponsored by BCI, Inc.
Cybercrime costs have increased at an alarming rate in the past two years. Hardly a week goes by without news of another major data breach, ransomware blackmail story, or cyberattack making front-page news. Most analysts predict that attacks will continue to increase in frequency, damage, and complexity with costs from consumer litigation, compliance requirements, and incident response expected to rise as a result. Implement managed security services powered by BCI and discover the true value of working with an established, proven, and trusted cybersecurity MSSP.

□ **How Not to Become Cyber Famous**

Presented by Forvis

This training session will give an overview of business e-mail compromise, including a recap of local recent events. Enhanced focus will be given on ways to identify and mitigate this threat. All payment processes are at risk, and we must be diligent in order to prevent a successful attack and cause your departments to lose thousands of dollars. Come prepared to share practice, insights, and leave with tangible takeaways to incorporate into your own practices.

□ **PERS On the Move**

Presented by PERS

In this webinar, PERS provides information about benefits, and available benefit options, as well as information on the retirement process.

□ **AI Policy for Mississippi Municipalities: Do You Need One, and What Should It Actually Do?**

Sponsored by Polimorphic

AI is already in your organization, whether you have a policy for it or not. The real question isn't whether to write one, it's whether the policy you have (or are considering) is actually helping your municipality adopt AI safely, or quietly getting in the way. In this session, we'll cut through the noise with a practical, honest conversation about AI governance for Mississippi municipalities from the perspective of both a state technology leader and a team building AI infrastructure for local government every day.

We'll explore: Do you actually need an AI policy? — What's driving the real risks and when a policy helps vs. when it creates more friction than protection Where existing policies go wrong — over-restriction, shadow IT, human verification burdens, and the accountability gaps that leave municipalities exposed What a good policy actually does — security and data protection, auditability, performance monitoring, and building toward the future without locking into point solutions How Mississippi's ITS AI framework aligns with platform-first thinking — a look at the state's 10 guiding principles and how they map to what modern AI infrastructure already provides.
